

## **Certified Financial Planner**

At Johnson Bixby, we believe financial empowerment is key to bettering our communities.

We use our expertise to unlock opportunities for our clients, the community and each other. Working together as a team, we engage in long-term relationships with our clients and together build a clear, realistic roadmap to help them reach their financial goals.

We're looking for an experienced Certified Financial Planner to join our growing team and become a trusted advisor to our clients, steward of our community and partner to our team. In this role you'll service the firm's clients and work alongside our experienced, caring and knowledgeable team.

If you have at least 3 years of financial planning and wealth management experience plus a Bachelor's degree from four-year college or university and your CFP® designation, we'd love to hear from you.

We offer a generous salary and benefits package, including paid time off, employer-paid medical insurance, 401(k) offering and more.

We look forward to chatting about how we feel it's more than simply financial planning. It's making a difference in the lives of those around us – our clients, our community and each other.
